Feburay 2022- Feburay 2026

Bachelor of Science - BS, Software Engineering

### **Pre Engineering**

MAR 2019 - MAR 2021

FSC in Pre Engineering

## SKILLS

### Frontend:

HTML5, CSS3, Sass/Scss, JavaScript, TypeScript, ReactJS, Next.js, React Native, Redux, Tailwind, Bootstrap, Material-UI, Ant Design, ReactStrap etc.

### Backend:

MYSQL, PHP, Firebase ,Node JS , Next js and Express js

### INFRASTRUCTURE & TOOLS:

Git, NPM, Yarn, Serverless, Firebase SDK, Postman etc

## LANGUAGES

English, Urdu

## PROJECTS

### ***Adzy Goods e-commerce website***

I developed a full-featured online marketplace platform tailored for the Pakistani audience, enabling seamless interaction between sellers and buyers. The platform ensures secure transactions through an escrow payment system and supports direct communication for efficient deal-making.

#### **Description**

- Developed a marketplace where sellers can list products and buyers can browse and make purchases.
- Enabled real-time communication between buyers and sellers for transparent and direct negotiations.
- Implemented seller notifications to dispatch products via TCS after payment confirmation.
- Designed intuitive user interfaces for account management, product listings, and order tracking.

#### **Technologies Used**

React.js, Next.js, Node.js, MongoDB, Tailwind CSS

### ***TASK HERO (Service based platform)***

I developed Task Hero, a service and product marketplace designed to connect customers with service providers and sellers across Pakistan. The platform offers a wide range of services such as home cleaning, repairs, and personal assistance, along with the ability to browse and purchase products from trusted vendors.

#### **Description**

- Created a multi-functional platform where users can book services (e.g., home cleaning, plumbing) and purchase products from verified sellers.
- Implemented a role-based system for customers, service providers, and product vendors to manage their profiles, listings, and transactions.
- Integrated a booking system with calendar scheduling, location input, and order tracking features for enhanced convenience.
- Developed a secure payment process using local gateways to ensure smooth transactions.
- Designed a responsive and user-friendly interface for seamless access across devices.

#### **Technologies Used**

React.js, Next.js, Node.js, MongoDB, Tailwind CSS, Google Maps API

### ***CUI HR MANAGEMENT SYSTEM***

The CUI HR Management System using modern technologies such as Next.js, React.js, and Tailwind CSS. This system is designed to simplify and enhance HR operations by providing an intuitive and efficient interface for managing employee data.

#### **Description**

- Secure login feature to ensure authorized access.
- HR can add, update, and delete employee records effortlessly.
- Filter employee data based on multiple criteria such as:
  - Education
- Grade and Scale
- Current Employment Status
- HR can export employee data in multiple formats, including:
  - CSV files
- PDF documents

## ***Technologies Used***

*React js , Next js and Tailwind CSS*

## **SI-UK WEBSITE**

*I developed a user-friendly and modern SI-UK Website Template with a sleek design to enhance user engagement and navigation. The website features an intuitive layout, ensuring a seamless experience for visitor*

### ***Description:***

- Designed a **user-friendly** and visually appealing website interface for SI-UK.
- Created a **modern layout** that ensures easy navigation and enhances user experience.
- Integrated a **Contact Us** page linked to a Gmail account for efficient communication.
- Ensured **mobile responsiveness** for optimal performance on various devices

### ***Technologies Used:***

*React js , Next js and Tailwind CSS*
